

CONVEYOR SOLUTIONS

- Eliminate Lubrication Needs
- Drastically Reduce Maintenance & Downtime
- Increase the Life of Chain & Drive Components

- Most conveyor wheels and bearings – full compliment, caged, flanged, hex bore, roller turn rollers, power & free units, and traction hubs can be processed with Cobra Solid Lubricants™
- Eliminate costly, messy, unreliable auto lube systems
- Never re-lube, even in very high temperature ovens
- Keep wheels rolling and production lines running with Cobra Solid Lubricants™

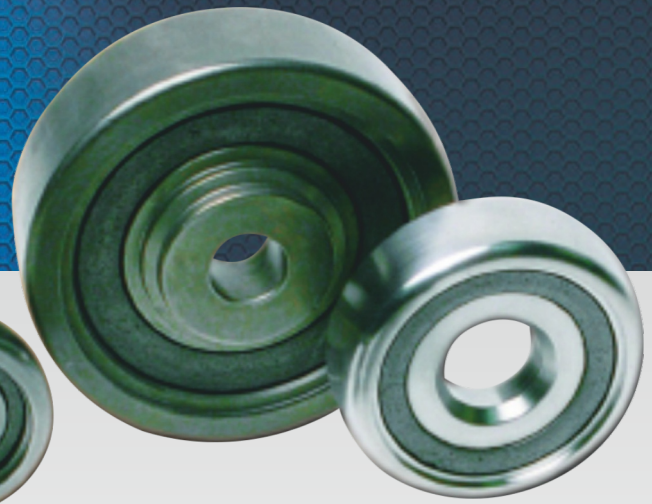

- Reduce friction
- No additional drag, even at sub zero temperatures
- Reduce chain stretch
- Reduce gear box wear
- Reduce power consumption
- Reduce down time
- Reduce maintenance

GRAPHITE SURROUNDS THE BALLS, FILLING ALL THE SPACE BETWEEN THE RACES.

TROLLEY WHEELS

ROLLER TURN ROLLERS

FLANGED WHEEL

HEX BORE

LUBRICATED FOR LIFE

- Never drips out, even at 660°F continuous
- Helps keep contaminants out of wheels
- Won't wash out even with steam or chemicals
- Safe for use in food application conveyors
- Won't gum up or deteriorate in radiation environments
- Ideal for paint booths, powder coating, and other material handling applications

UTA can design & manufacture custom trolley wheels, flange wheels, and bearings to suit any application. Stainless Steel options available upon request.

Unique Technologies Associates works with most conveyor manufacturers and distributors. Contact Unique Technologies Associates for more information.
